

What is claimed is:

1. A delivered article receiving locker cabinet comprising:
a plurality of lockers, each of which is capable of housing
a delivered article and is locked, and

ten keys by which numbers, such as a room number of a delivery
end and a locker number, are inputted, said locker cabinet further
comprising:

a barcode reader, attached to a front face thereof, for
reading a barcode written on a delivery service attached note
attached to the delivered article, and

a memory for storing information read by the barcode reader.

2. The delivered article receiving locker cabinet according to
claim 1, wherein a second barcode reader, which is capable of
reading the barcode written on a delivery service attached note
while being held by the hand, is connected to the barcode reader
in parallel with each other.
